

EDM as well as manufacturing and supplying the Spanwall MF3 rainscreen system also fabricate metal faced cassette panels for other proprietary rainscreen hanging systems. The speed and accuracy of the combined turret punch and laser along with the powerful multibend folding cell gives EDM lower production costs than any other comparable manufacturer.

For details on the systems and the full range of panel materials and finishes contact our Technical Sales Office.

Rainscreen edge details for the hanging of rainscreen panels to alternative carrier system.
